

FINAL PROJECT SUBMISSION [002]

DESCRIBE HOW EFFECTIVE YOUR PLAN WAS IN COMPLETING YOUR PROJECT (250WORDS)

-DID YOU STICK TO YOUR SCHEDULE?

-DID YOU DIVIDE UP THE TASK AND THE TIME EFFECTIVELY?

-DID YOU HAVE UNEXPECTED DIFFICULTIES OR CHALLENGES?

PLANNED SCHEDULE:

DIV-SLIDERS-BUTTONS (week13-14)

REMAINING TOOL (week15-16)

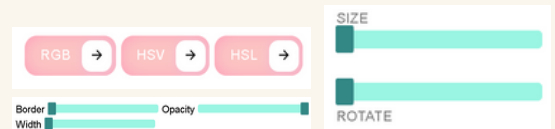

SOUND/UX ELEMENTS (week17)

INTERFACE (week18)

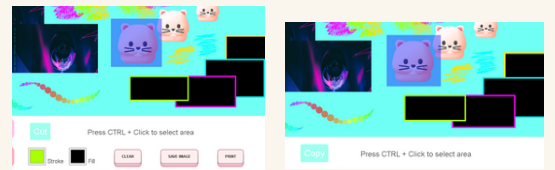

TEXT/FIND BUGS (week19-20)

How it was made:

(WEEK13-14): The buttons, sliders and details corresponding to each tool were correctly implemented.

(WEEK15-16): Two tools "cutPasteTool()" and "copyPasteTool" were correctly implemented, also more details (buttons, sliders, functions) were implemented for the other tools.

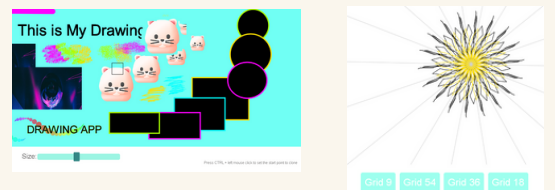

(WEEK17-18): Background music was implemented but also two more tools "textTool()" and "filtersTool()". In addition, the interface of the application has been improved.

(WEEK19): I decided to implement two more tools: "cloneShapeTool()" and "geometricDesignTool()"

(WEEK20): Every day I did application tests with the help of my friends and family.

The schedule was followed correctly; however, there were new implementations along the way (tools, buttons, sliders, inputs). Finally, the application was put to the test and the bugs still present were fixed.

The time and tasks were divided according to the time that each one required to be implemented. However, some tools and details took longer than anticipated, which honestly wasn't a problem as everything was finished on time.
