

IMPLEMENTATIONS ORDER

Moon Dark

WEEK(13-14) **BUTTONS, ALERTS, LABELS CUTPASTETOOL()**

During this week, new buttons, sliders, checkboxes, labels, and alerts were implemented. For example; for the "addImageTool()" tool, if the user adds a file that is not an image, an alert will appear indicating that the added file is not an image.

WEEK(15-16) **COPYPASTETOOL() TEXTTOOL()**

A tool was added to copy and paste a selected area of the canvas to another location. Additionally, a tool was also added to add text to the canvas.

WEEK(17-18) **FILTERSTOOL() - MUSIC UI/UX MODIFICATIONS CLONESHAPETOOL()**

New functionalities were added to the application, including a tool to apply filters to the canvas, a tool to clone a section of the canvas to another location, ambient music, and aesthetic changes in the user interface.

WEEK(19-20) **GEOMETRICDESIGNTOOL() TEST THE APP AND FIX BUGS**

A final tool was added to simulate the shape of a spirograph and finally the application was tested to verify that everything works correctly.
